

Luminetta

Luminetta Multicolour ...

...the further development of LED-spotlights.
For indoor swimming pools, saunas, whirlpools and gardens.

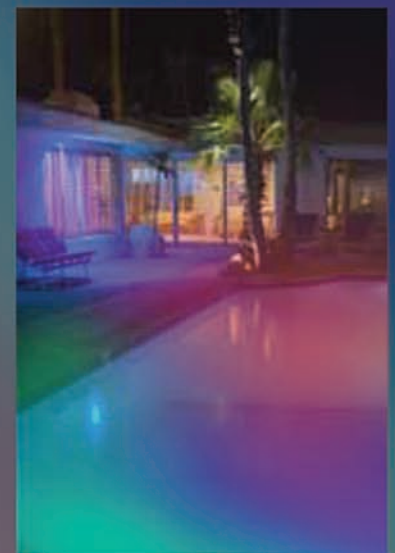

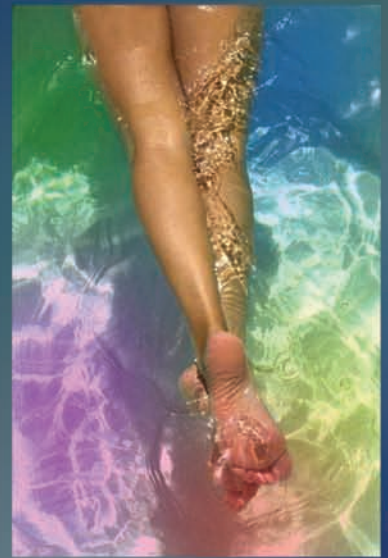

The **red** dawn- which reflects in the water -
The ice cold blue of clear and refreshing water or **turquoise**,
which reminds of the last vacation. The pool party in **pink**...

1,6 million colours created by just one lamp!

The lighting - technology changes. Lamps which create
1,6 million different colours, a magic of spirits and colours.
Besides the well known LED- lamps for illumination and irradiation
of swimming pools, building etc. the company MTS- Produkte has
now developed a new system for more colours and effects.
- **Luminetta**.

The new developed Luminetta lamp works like a little monitor-
which creates 1,6 million colours. Colours which appear in special
moments- in different places- in the nature.
Until 30 lamps can be controlled by just one IR- remote control.
Each lamp can have a own colour or all lamps a common one.
For the quick change or even for long time.
With the IR- remote control you decide for your own in which flow
function and colour for example your pool should shine.

Flash - colour flow - colour flow fast
all colour variation from each lamps - constant wished colour
